

CDM ADVISORY SERVICES

egniol

Ensuring that our client's projects are delivered safely, and can be operated and decommissioned safely, is our key priority. Egniol provides a comprehensive and tailored CDM advisory service that supports the role of the Client, Principal Designer,

PRINCIPAL CONTRACTOR AND CONTRACTORS

With particular expertise in construction health and safety, we can assist Clients and Contractors/Principal Contractors as their CDM Advisor and we carry out the role of Principal Designer. We work with companies of all sizes, including architects, developers, local authorities, estate managers, manufacturers and construction contractors.

ROLE OF PRINCIPAL DESIGNER (CDM 2015)

Egniol has the required competence and resource to carry out the role of Principal Designer to plan, manage and coordinate all matters relating to health and safety during the pre-construction phase. We have an enviable track record operating as Principal Designer, having worked on projects of varying complexity and scales across the UK. Our team is also regularly asked by our clients to undertake independent audits of the Principal Contractor activities in relation to CDM compliance at all stages of project delivery. Working closely with our engineering teams, our health and safety advisors are practical and rigorous, developing proportionate solutions to project risk management.

HIGH RISK CONSTRUCTION ACTIVITIES

Egniol has experience in providing advice and guidance on high risk activities and work at height solutions. Our health and safety advisors have worked alongside client health and safety teams and provided project management with health and safety advice and guidance to ensure compliance with CDM.

PROJECT EXAMPLES INCLUDE:

- A complex roof refurbishment on a commercial building used to recycle plastic waste undertaken whilst client operations continued in the building.
- Coordination of a Temporary Works structure to support a section of roof which had failed.
- Delivery of various large scale waste management facilities.
- Coordination and monitoring Works to remove a section of a commercial building roof to facilitate a lifting operation involving a tandem crane lift and subsequent roof replacement in a short window of opportunity.
