

EIA CO-ORDINATION

egniol

Environmental Impact Assessment (EIA) is an essential part of any large scale project. It informs the development process on the potential environmental impacts of the proposed scheme at an early stage and, when done properly, provides for the design and implementation of measures to eliminate or mitigate any risks, helping to streamline the planning process and saving money in the long run.

OUR EIA CAPABILITIES INCLUDE:

- Screening and Scoping
- Project management of the EIA process
- Co-ordination of the necessary technical specialisms
- Preparation of the Environmental Statement
- Liaison with the Local Planning Authority and wider stakeholders
- Attendance at Public Exhibitions and Meetings

WE WORK ACROSS A NUMBER OF INDUSTRY SECTORS AND HAVE MANAGED EIAs FOR A WIDE RANGE OF DEVELOPMENTS INCLUDING:

- Residential
- Commercial
- Urban regeneration
- Waste management facilities
- Renewable energy facilities

With Egniol you can be sure of an integrated approach to your EIA. The collection of environmental information, the assessment of environmental effects and the identification of appropriate mitigation strategies happens seamlessly. We work closely with you and the project stakeholders to ensure that the EIA comprehensively supports your planning application.
