

ENVIRONMENTAL MONITORING AND REPORTING

Maintaining the quality of our air, water and land is an ever increasing priority for our growing society. Accurate and timely environmental monitoring is fundamental in this process and is required for a wide range of situations, in order to satisfy both investigative and statutory requirements.

OUR TEAM IS EXPERIENCED IN THE COLLECTION OF ENVIRONMENTAL DATA FROM A WIDE RANGE OF SOURCES, INCLUDING:

- Landfill gas and leachate
- Surface water and groundwater
- Air and gaseous emissions
- Particulates
- Bioaerosols
- Contaminated soil
- Noise and vibration sources

All environmental testing is undertaken by our partner UKAS/MCERTS accredited analytical laboratories.

WE ARE ALSO ABLE TO PROVIDE INTERPRETATIVE REPORTING SERVICES INCLUDING THE PREPARATION OF:

- Environmental Monitoring Plans
- Environmental Risk Assessments
- Environmental Monitoring Data Reviews in accordance with Environmental Agency Environmental Permitting (formerly PPC/WML) Regulations
- Landfill site Quarterly and Annual Performance Reviews
- Management Plans for Landfill Gas, Leachate, Surface Water, Accidents, Particulates and Odour.
- Water Quality Assessments
