

OPERATIONAL SUPPORT

Operational facilities face a series of ongoing challenges that need to be properly understood and managed in order to deliver the commercial returns on their capital and operational investment.

EGNIOL PROVIDES SPECIALIST SUPPORT ACROSS A WIDE RANGE OF OPERATIONAL ISSUES, INCLUDING:

- Regulatory compliance
- Plant performance review and optimisation
- Health and safety audit, review and improvement
- Planning compliance review
- Design for facility expansion and extension
- Material input and output compositional analysis
- Emergency plans and business continuity planning
- Fire prevention plan preparation
- Financial Provision review
- Environmental monitoring

Whatever your operational challenge our team can help you to find the right solution. Whether you want to ensure that your facility is fully compliant with the relevant legislation, improve the performance of your plant or increase the capacity of your process, we are here to guide you.
