

# REGULATORY COMPLIANCE & PERMITTING

egniol

Compliance with the raft of environmental regulation that applies to the management of waste in the UK is a paramount consideration for most companies that are involved in the management or disposal of wastes. The reputational and financial damage that can be caused by breaching the law can be significant and hugely detrimental to any business.

Our team of regulatory professionals can support you in securing and maintaining compliance with your operational permits. We have excellent working relationships with the UK regulatory bodies and detailed knowledge of the regulatory guidance that informs the permitting process. Our regulatory team is closely supported by our in house environmental and engineering staff to provide a robust and comprehensive service across all aspects of regulatory compliance.

## WE CAN PROVIDE THE FOLLOWING SERVICES:

- Environmental Permit applications for new Waste Facilities or Installations
- Variations to existing Environmental Permits
- Closure Plans for landfills
- Permit surrender applications
- Exemptions for waste activities
- Preparation of procedures, risk assessments and statements to support any application

We can also offer advice on compliance issues including compliance auditing of new and existing facilities, assistance with waste characterisation negotiations with the regulator and classification advice.

Our record of success in the field of regulatory compliance and Environmental Permitting for both proposed and existing waste facilities means you can be confident your business is in safe hands.
