

# WASTE AND RESOURCE MANAGEMENT

Egniol maintains a significant presence in the UK waste and resource management sector. We combine our engineering, project management, planning and environmental skills to deliver turn key solutions to our clients in the waste sector. This enables us to deliver a wealth of different projects each year on behalf of our clients. The waste and resource management sector in the UK has evolved dramatically over the last 10 years and continues to be a dynamic industry as local authorities and private sector waste operators continue to work towards challenging recycling and landfill diversion targets.

## EGNIOL PROVIDES A BROAD RANGE OF SERVICES ACROSS THE FULL ASSET LIFECYCLE TO MEET THE NEEDS OF THIS FAST CHANGING SECTOR, INCLUDING:

- Project feasibility and due diligence
- Owner's Engineer during facility design, development and delivery
- Technical Advisor contract bid support
- Operational support
- Decommissioning and handback
- Environmental Permitting and regulatory compliance
- Waste planning and EIA

## OUR SPECIALISTS HAVE WORKED ON A WIDE VARIETY OF WASTE TREATMENT AND DISPOSAL FACILITIES, INCLUDING:

- Household Waste Recycling Centres
- Waste Transfer Stations
- Anaerobic Digestion facilities
- Material Recovery facilities
- Gasification facilities
- Engineered landfill containment

The waste sector is a commercially challenging environment and this means that getting the right approach to the delivery of a new facility, or to the upgrade or refurbishment of an existing facility, is critical to the project success. You can trust our 25 years of experience in the waste sector to help you every step of the way.
