

## **JOB ADVERT**

### Civil Engineer - Milton Keynes

We are seeking a Civil Engineer to join our team in Milton Keynes. The role is office based with site visits (UK wide) as and when required. In this role, you will support with the management of complex civil engineering projects from conception through to completion, ensuring the highest standards of quality, safety, and efficiency.

Our offices in Milton Keynes are based in the Canon Harnett Court business park, ideally located close to Stony Stratford & the A5, the business park has ample parking, electric vehicle charging points, bicycle racks, an onsite café and Victorian Ponds.

Egniol Consulting is an independent multi-disciplinary engineering, environmental and project management consultancy. We provide essential support across a wide range of sectors at all stages of the built environment development that improves our communities, protects our environment, and creates value for our clients. Our purpose is not just what we do but the difference we make.

We are proud to be accredited as Gold Investors in People, reflecting our commitment to excellence and the trusted expertise of our team. At the heart of everything we do are our core values: Determined, Responsive, Accountable, Integrated, and Genuine.

We offer a competitive remuneration and benefits package, including:

- Membership of our Group Personal Pension Plan, with matched Employer's contribution of 4%.
- Payment of a relevant professional subscription.
- 25 days annual leave per year (plus Bank Holidays).
- Training and professional development plan.
- Inclusion in our Life Assurance Policy, insuring you to 4 times your annual salary.
- Income protection scheme.
- Private Healthcare
- Healthcare Cash plan
- Flexible working arrangements.
- Cycle to Work Scheme.
- Annual paid volunteering day.

## **Roles and Responsibilities**

- Preparation of general arrangement and detailed working drawings for civil engineering projects.
- Preparation of drawing issue sheets and registers and ensuring all incoming and outgoing documents/correspondence are saved in accordance with internal QA protocols
- Undertake design work in accordance with British Standards, Design Manual for Roads and Bridges, Sewerage Sector Guidance, etc to successfully deliver projects for our clients, and for submission to the Local Authority.
- Work closely with other members of the team, in particular CAD technicians in the preparation of working general arrangement and detail drawings. In some instances, drafting services will need to be undertaken by graduate engineers.
- In addition to design tasks, you may be required to assist in undertaking topographical surveys, supervise trial hole investigations, and undertake visual inspections.

## **Role Requirements**

- Have or gain a sound understanding of technical design packages including Civil 3D, WinDes etc to support the design process.
- Ability to produce basic AutoCAD drawings as required.
- Under guidance of a Senior Engineer, develop engineering inspection and reporting skills.
- Work with Senior Engineers to ensure designs meet the client brief.
- Full driving licence and the use of a car.
- Minimum 2 years' experience as a graduate Civil Engineer

## **Qualifications**

### Preferred

- Completion of Degree in relevant Engineering subject
